ON-FARM TRIAL CONCLUDES

DID STRUT LIVE UP TO EXPECTATIONS?

It's official, we are finally done with our on-farm trial program! It's been a wild ride, which saw us develop, build, test and install:

- 2 x LoRaWAN Gateways
- 40 x Beta Sensor Nodes
- 2 x Online Dashboards
- 1 x Rhys Bischof

We would like to thank everyone who was involved in the project for being so generous with their time and going above and beyond to help us.

It's been fantastic to be able to collaborate with local businesses and we count ourselves extremely lucky to have been given the opportunity.

Now that we've thanked everyone, why not show-off a little?

Here's some client feedback that we're pretty proud of; What was best thing about using STRUT's system?

"The availability of the information and how simple it is to use and check the data. The professionalism of STRUT and how the system was installed. It was very easy to communicate and fine tune the system to customise the system to our needs." -

Andrew Mahoney, Leura Park Estate

"We have really enjoyed seeing the strong connection between the sensors and gateway from various long-distance sites around the olive grove, and it has been very interesting to understand more about the benefits of the LoRa connection. The dashboard provides a great visual representation of the grove conditions and has been helpful for us to compare the planned irrigation cycles with the fluctuation of the actual soil moisture, as well as monitoring temp, humidity, light."

Cameron Barr, Boundary Bend Olives

GPS TRACKERS

STRUTS NEXT
PRODUCT OFFERING

Following some client feedback, we developed a LoRaWAN GPS Tracker!

It may not look like much, but that humble little box provides a lot of benefits. It can help with:

- Asset tracking
- Security
- Management costs
- Fuel consumption
- Efficient equipment retrieval
- Equipment recovery

and best of all, it integrates with our online dashboard!

CORONAVIRUS AND STRUT

STILL MOVING
FORWARD

The COVID-19 Pandemic is causing havoc across the world and has seen many businesses and lives disrupted and even STRUT isn't immune to this.

We're glad to report that we've been coping well as a team, utilising video calls and online collaboration to keep things moving.

When we do start to feel a bit overwhelmed, we like to take a step back and remember 'the good old days' and remind ourselves that this too, shall pass.

We hope that everyone reading this is coping as well as Darcy and Richard and we can't wait to catch up with everyone post-isolation!
